- 1.3 PREREQUISITES
- 1.4 STEPS
- 1.5 FOLLOW-UP ACTIONS

#### **1.1 GENERAL**

This document runs through the procedure for installing Italax.NET on a server for a multi user installation.

### 1.2 USAGE

This document applies only when installing Italax.NET for use on a server for a multi user installation of Italax.NET.

For information on installing Italax.NET in a single user situation, please refer to: *"Install Italax.NET (Single user installation)"* 

# **1.3 PREREQUISITES**

None.

#### 1.4 STEPS

#### **IMPORTANT** !

Installing Italax.NET may require one or more restarts. Before running any Italax.NET installer, it is necessary to save information and close any applications that you may have running. We recommend performing server installations of Italax.NET outside of normal working hours so as to avoid inconveniencing users if a server restart is required.

- From the <u>Italax.NET downloads page</u>, download the appropriate install package. If the PC on which Italax.NET is being installed does not have internet access, you will need the Italax.NET install (No internet connection) package instead.
- 2) Unpack the installation package to a fold on your hard drive
- 3) Double click the Setup.exe file to start the installation

The install package will install necessary prerequisites as required. These prerequisites may take some time to install.
